

Your Private Driver, On Demand.

A global marketplace connecting discerning travelers with independent, licensed chauffeurs and their executive vehicles.

Premium ground transportation is broken for both sides.

Travelers

Rideshare is unreliable for executive travel. Limo companies feel dated, opaque, and inflexible.

Chauffeurs

Independent drivers own great vehicles but lack global discovery, booking tools, and recurring clients.

Businesses

Travel managers piece together regional vendors, with no single account, billing, or compliance trail.

A marketplace built for private, hourly-to-monthly travel.

- Vetted, licensed chauffeurs with their own executive vehicles
- Book by the hour, day, week, or month — no minimums, no surge
- One account for personal, business, and recurring corporate travel
- Transparent pricing, in-app messaging, and verified compliance

The market is finally ready for this.

- Companies need a single, auditable vendor for global ground travel
- AI-led matching and verification finally make a quality marketplace possible

Not a fleet. Not a broker. A curated marketplace.
